A Brussels despatch says "German Forces are advancing on us along the line."

The censorship of the British authorities over the movements of the allied forces on the continent is so strict that little authentic news is being received in this country, and equal secrecy guards the movements of the British fleet in the North Sea.

Despatches to hand today state that English commerce on the seas is almost normal. The French fleet in conjunction with Montenegrin forces bombarded the Austrian Port of Cattaro, when they completely destroyed one fort and rendered the other useless.

Belgian forces have been compelled to evacuate Brussels.

Hundreds of wounded Belgian soldiers arriving in Antwerp speak of the superhuman bravery of the Germans under heavy artillery fire. The Belgian army headquarters are reported to be captured by over-whelming numbers of Germans whose forces received terrible punishment from the magazine guns of the Belgians.

It is understood that the allies have changed their battle plan and the greatest battle in the history of the world is now raging from Namur to Diest and on the field of Waterloo. The next forty eight hours should show important changes.

Berlin officially announces that Germany will reject the Japanese ultimatum.

The French forces are actively engaged at various points in Alsace with the undoubted object of cutting off German supplies. The tremendous Russian armies are steadily advancing into Germany and Austria.

The Belgian forces are falling back on Antwerp without engaging the enemy. The French troops have met with brilliant success in Alsace, compelling Germans to retreat with loss of 24 guns.

The Italian government has protested to Austria following the landing of Austrian troops in Albania for attack on Serbia.

#### Local Man Leaves Town

#### A Volunteer For Active Service

Mr. M. M. McDonald left town on Monday morning to join the men of the 105th. regiment in Saskatoon who have volunteered for active service. Owing to his sudden departure many of his friends did not have an opportunity to say good-bye or wish him God-speed. Those who knew he was going, assembled at the station to give him a send-off and as the train pulled out a lusty cheer followed our first volunteer from this town.

The movements and operations of the 105th. regiment will be of great interest to McDonald's numerous friends here.

The meeting was unanimous in its opinion that a hospital established at this point was most necessary. A motion to the effect that a committee should be appointed to investigate the cost of building a eight roomed hospital, cost to include lot and well, and report to the R.M. of Cereol, before Aug. 29th, by councillor McCallum was carried. On motion of Mr. Kelly, Mr. F. J. Whitlock, Mr. Thos. Lees and Mr. J. Nisimith were appointed. After further informal discussion of the subject the meeting was adjourned.

## TYPHOID FEVER

The following letter has been received by Dr. Swartzlander from the Health Department and is published in the interests of this community.

Edmonton, Aug. 6, 1914.

Dr. Swartzlander,  
Oyen, Alta.

Sir,

The tide of year when Typhoid is most prevalent is now approaching.

Last year there were 161 deaths, a number far too large, considering that Typhoid is a preventable disease.

The attention of the Local Board of Health is called to the use of anti-typhoid vaccine for the prevention of this disease. This vaccine is of great value as a prophylactic in unattended outbreaks, and will confer immunity for eighteen months. A supply of it may be obtained from the Provincial Board of Health at cost price.

The use of this vaccine must not be considered the only method for the prevention of typhoid, and its use is not to interfere with the ordinary sanitary methods.

Typhoid is a communicable disease and is chiefly transmitted through flies or contaminated water.

Care should be taken in every Municipality that all outhouses, garbage and other breeding places for flies be immediately destroyed, and kept clean; that all houses, hotels and restaurants be properly screened against flies that all privies be cleaned and disinfected at regular intervals.

The water supply of the town should be carefully guarded so that it may not be contaminated from any source.

The Provincial Board will gladly assist any municipality with advice as to the best methods of sanitary protection.

I have the honour to be, Sir,

Your obedient servant,  
W. C. LAIDLAW,

Provincial Medical Officer of Health.
